

# Take-out Troubles

Your new and extremely quirky boss just asked you to order lunch for the team. When you ask for details, he says "the usual" and hands you a tattered menu along with a check for \$175.45. He waves you out of the office and you're left confused, not even sure what the restaurant is. Not one to give up on seemingly impossible tasks, you take a look at the bizarre menu and realize there might be a way to figure out the order after all...
