

DATE NIGHT

Five men took five different best friends on a date at different parts of the big city. Adam wants to take his date out too, but he doesn't want to copy any of the other guys (best friends like to dish on their dates, and Adam wants his date to feel special). The guys, however, are making it difficult for Adam and won't give him a straight answer. By following the lines of clues, can you figure out a unique place where Adam can take his date to?

	Toby									
	Mitch									
	Jeremy									
	Ryland									
	Eugene									
	Movies									
	Library									
	Bowling									
	Pizza									
	Beach									
Layla										
Jodie										
Michelle										
Suzie										
Ellie										
Movies										
Library										
Bowling										
Pizza										
Beach										

1. There is no combination of a man and woman who share the same first initial.
2. Layla's date (who wasn't Toby) did not take her to a place that sells food.
3. The five men are Toby, the one who took out Ellie, the ones who took their dates to the Beach and the Library (neither of which was Ryland), and another man whose date ends with "ie."
4. Eugene took his date to the movies, while Jodie's date took her to the Beach.

DATE NIGHT

5. Ellie found out that her date is a pineapple guy (she requested they only get it on half the slices).
