

Rainbow Matryoshka SOLUTION

This puzzle is more of a pinpoint game, in which you try to solve for the exact location by solving a series of small riddles. The game's rules/hints are all in the title. The word Rainbow gives you the sequence in which you solve the puzzle. (Red,orange,yellow, green,blue,purple fireworks.) The word Matryoshka means russians dolls that stack within each other from large to small. This symbolizes each picture within the firework, which gradually leads to a more specific location. (Continent, Country, State, City, Attraction , Main point of Attraction.)

As given in the title you start with the color red and try solving for the location depicted using the given pictures, and are allowed to use any outside source if necessary. The first color has a compass pointing to North, and a picture of Amerigo Vespucci, a explorer in which the continent was named after (**Solution: NORTH +AMERICA**)

Then following the color scheme, you solve for the orange firework. Which has a picture of the Bald Eagle, which represents Freedom and is the national bird of USA. (**Solution: United States of America**)

The yellow firework has a picture of a flag which consists of a bird and american shield. Knowing that this puzzle is a pinpoint game, and given the first 2 answers, it can be assumed that the given would most likely be a state. Using outside sources and finding this flag, will lead the person to decipher that this is the Illinois flag. (**Solution: State-Illinois**)

Onwards to green, there is a picture of a cloud blowing wind and a city. This symbolizes Windy city, another name for Chicago. (**Solution: City-Chicago**)

The blue firework consists of different shades of blue, with an arrow pointing to a darker shade. And a dock like picture. The shade of blue it's pointing to is Navy Blue, and the other picture represents a Pier. If you think of a place in Chicago that consists of the word Pier, most likely conclude that it depicts Navy Pier. (**Solution: NAVY PIER**)

The fun doesn't end there, because there is one last picture to solve. This picture is pretty straightforward. It's the main attraction at Navy Pier and the picture basically depicts it. (**Solution: Ferris Wheel**)

Overall Solution is **The Ferris Wheel at Navy Pier.**
