

## Trick or Treat!

I went trick-or-treating with my 8 friends. Here's the candy we got:

- 4.7 Gelatin malware (5,4)
- 4.3 Chomp (6)
- 6.3 Sherlocks (8)
- 6.7 Laughter (8)
- 3.7 Eminems (1,3,2)
- 3.3 Bad dentist (10)
- 2.7 Mouse catcher (3,3)
- 9.3 Puzzlers, for example (5)
- 5.3 Arthos, Porthos, Aramis (5,10)
- 8.3 Points (4)
- 7.3 Atmosphere noggins (3,5)
- 7.7 Slangily jealous pods (5,5)
- 8.7 Smooches (8,6)
- 2.3 Fisk (7,4)
- 0.7 Happy cowboy (5,7)
- 1.7 Sweet maize (5,4)
- 1.3 ROFL lithium unpush (8)
- 5.7 Inflatable buoys (10)

We divided the candy so that each of us got 2 pieces of candy, and then we hid the candy inside the colored regions of our houses.

Our houses are the same in *sum* ways:

- We arranged the candies so that each row/column has 2 candies: one ending in .3, and one ending in .7.
- No two candies are horizontally or vertically adjacent.
- As precaution against *certain dextrous* thieves, there is no candy in the middle of any of our houses. Instead, each of us has a marker there.
